

Easterhouse has a population of 2,815 children and young people (aged 0-24 years).

## Neighbourhood Comparisons with Glasgow

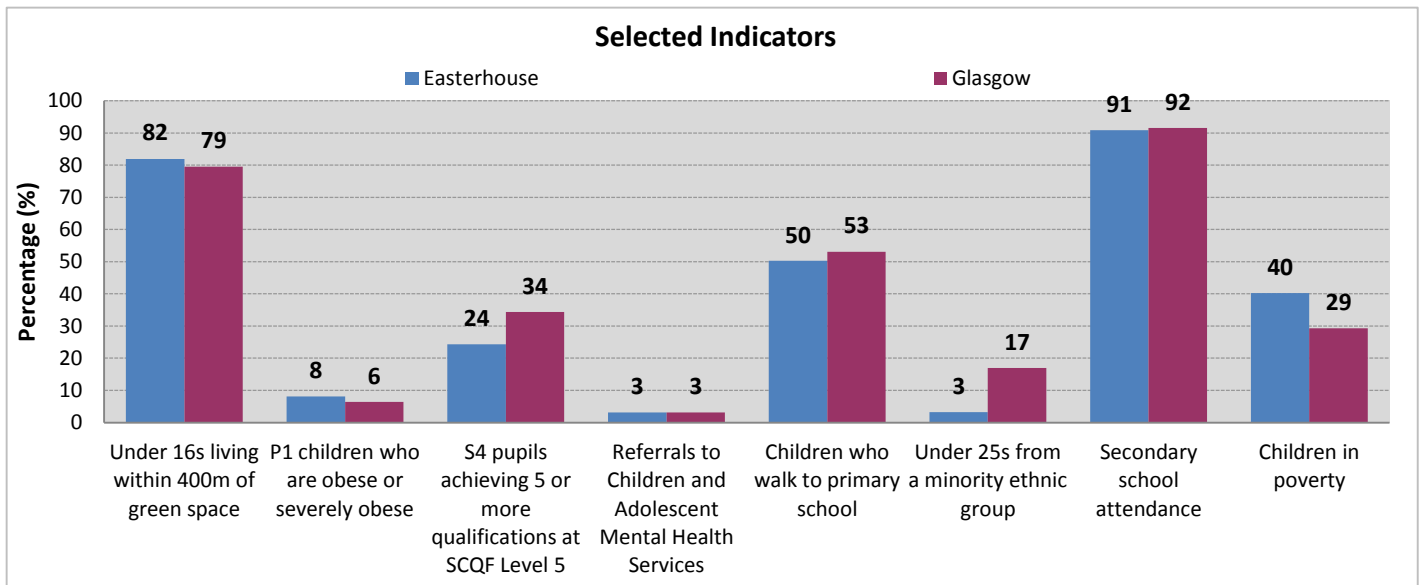

The proportion of school age children in Easterhouse is higher than Glasgow as a whole. 3% of under 25s are from a minority ethnic group. 82% of children live within 400m of green space. The neighbourhood has higher levels of obesity in P1 children (+27%) and more babies exposed to passive smoking (+55%) than Glasgow overall. S4 pupil attainment is lower (-29%) than the Glasgow average but 86% of children leaving school go onto a positive destination (higher/further education, employment or training). Likely development difficulties in pre-school children are higher than the Glasgow average (+17%) but communication delay in young children is lower than average (-5%).

Domain	Indicator	Count	Rate	Difference from Glasgow	Period
Demography	Population aged 0 to 4	689	8%	+35%	2015
	Population aged 5 to 11	679	8%	+16%	2015
	Population aged 12 to 17	592	7%	+22%	2015

	Male healthy life expectancy (years)	N/A	50.2	-10%	2011
	Female healthy life expectancy (years)	N/A	52.6	-10%	2011
	Under 25s whose day-to-day activities are limited by disability	225	8%	+34%	2011

## Neighbourhood Trends

The number of 12-17 year olds in Easterhouse has decreased by 14% since 2011, while the number of 0-4 year olds has increased by 21%. Healthy life expectancy for males and females is approximately 6 years lower than Glasgow as a whole.

Pupil attainment in Easterhouse is markedly lower than the Glasgow average, while child poverty and P1 obesity levels are higher. Although slightly more children than average live in proximity to green space, primary school children are less likely to walk to school when compared to the Glasgow average. Secondary school attendance and referrals to children and adolescent mental health services are on a par with Glasgow overall. Easterhouse has relatively few children and young people from ethnic minority groups.

## Notes

1. Data sources: Census 2011, GCPH, Glasgow City Council, HMRC - Child Poverty Unit, ISD Scotland, National Records of Scotland (NRS), Transport Scotland, Sustrans, Police Scotland, the Scottish Government and the Urban Big Data Centre, Glasgow University.
2. Indicators are aggregated using latest available datazone (2001 or 2011); neighbourhood boundaries based on 2001 datazones.
3. All count figures of less than 5 (denoted as '< 5') have been suppressed to avoid any potential identification.
4. Populations presented in the population trend chart, also used to calculate healthy life expectancy estimates, use NRS small area population estimates for the years 2011 - 2015.
5. 'Healthy life expectancy' is an estimate of the average number of years people are likely to spend in good health. It is shorter than 'life expectancy' because it excludes years likely to be spent in fair or poor health. It is calculated using population estimates, death registrations and self-assessed health from the 2011 Census.
6. Denotes children referred to the Scottish Children's Reporter Administration for an offence or non-offence related reason.
7. A notes and definitions document providing further information on the indicators presented in the profile can be found in the Profiles section of [www.understandingglasgow.com/profiles](http://www.understandingglasgow.com/profiles).
