	School leavers with a positive destination	35	90%		+0% 2013
	16 to 19 year olds not in employment, education or training	64	12%		-58% 2012
Health and Wellbeing	Pre-school children with likely development difficulties	N/A	11%		+61% 2012 - 2014
	Referrals to Children and Adolescent Mental Health Services	22	2%		-30% 2015/16
	Male healthy life expectancy (years)	N/A	55.6		-1% 2011
	Female healthy life expectancy (years)	N/A	58.2		-1% 2011
	Under 25s whose day-to-day activities are limited by disability	144	3%		-44% 2011

The number of 0-24 year olds in Yorkhill and Anderston has increased by 13% since 2011, with the largest increases being among 0-4 year olds (21%) and 18-24 year olds (13%). Healthy life expectancy for males is on a par with Glasgow as a whole and is approximately 1 year lower for females.

Pupil attainment and P1 obesity levels in Yorkhill and Anderston are higher than in Glasgow overall, while child poverty is on a par with the Glasgow average. The number of children living in proximity to green space is similar to Glasgow overall but primary school children are less likely to walk to school. The proportion of children and young people from minority ethnic groups is higher than the Glasgow average and referrals to children and adolescent mental health services are lower.

### Notes

1. Data sources: Census 2011, GCPH, Glasgow City Council, HMRC - Child Poverty Unit, ISD Scotland, National Records of Scotland (NRS), Transport Scotland, Sustrans, Police Scotland, the Scottish Government and the Urban Big Data Centre, Glasgow University.
2. Indicators are aggregated using latest available datazone (2001 or 2011); neighbourhood boundaries based on 2001 datazones.
3. All count figures of less than 5 (denoted as '< 5') have been suppressed to avoid any potential identification.
4. Populations presented in the population trend chart, also used to calculate healthy life expectancy estimates, use NRS small area population estimates for the years 2011 - 2015.
5. 'Healthy life expectancy' is an estimate of the average number of years people are likely to spend in good health. It is shorter than 'life expectancy' because it excludes years likely to be spent in fair or poor health. It is calculated using population estimates, death registrations and self-assessed health from the 2011 Census.
6. Denotes children referred to the Scottish Children's Reporter Administration for an offence or non-offence related reason.
7. A notes and definitions document providing further information on the indicators presented in the profile can be found in the Profiles section of [www.understandingglasgow.com/profiles](http://www.understandingglasgow.com/profiles).
