

Knightswood has a population of 4,588 children and young people (aged 0-24 years).

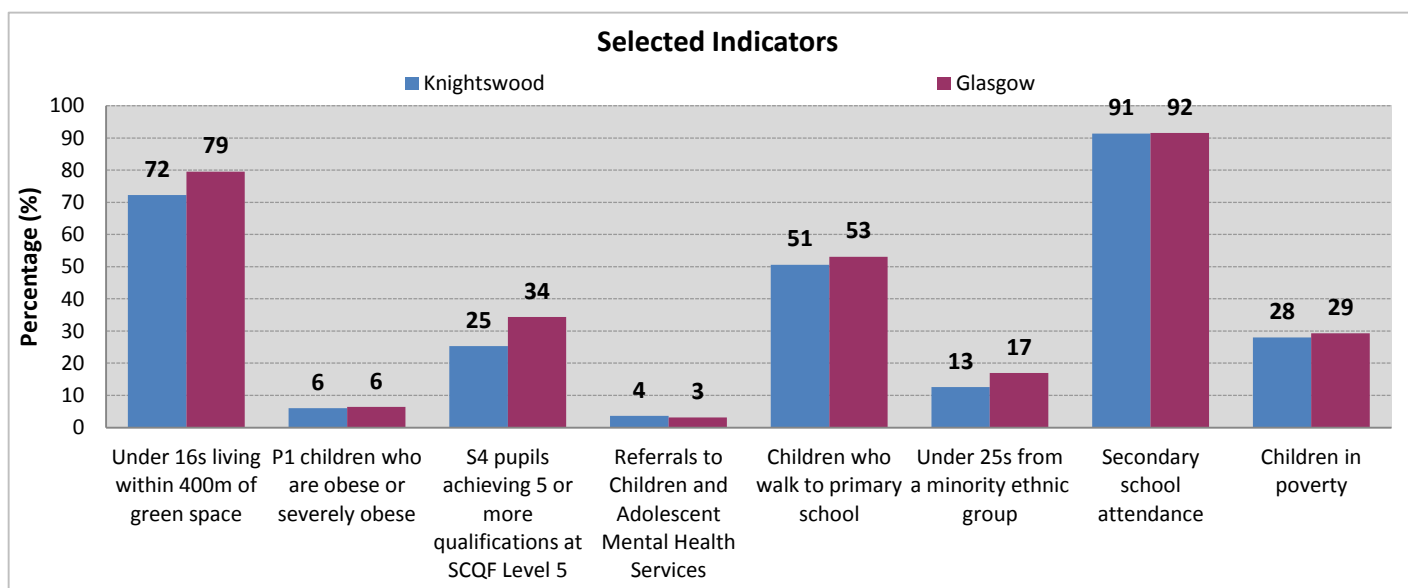

Neighbourhood Comparisons with Glasgow

The proportion of school age children in Knightswood is higher than Glasgow as a whole. 13% of under 25s are from a minority ethnic group. 72% of children live within 400m of green space. The neighbourhood has more referrals to the Scottish Children's Reporter Administration (+7%), more offenders (+10%) but fewer babies exposed to passive smoking (-21%) than in Glasgow overall. S4 pupil attainment is lower (-26%) than the Glasgow average and more 16-19 year olds are not in employment, education or training (+34%). Likely development difficulties in pre-school children are higher than the Glasgow average (+10%) but communication delay in young children is lower than average (-3%).

Domain	Indicator	Count	Rate	Difference from Glasgow	Period
Demography	Population aged 0 to 4	928	6%	-6%	2015
	Population aged 5 to 11	1,191	7%	+5%	2015
	Population aged 12 to 17	1,117	7%	+20%	2015
	Population aged 18 to 24	1,352	8%	-32%	2015
	Birth rate (per 1,000 pop'n)	164	9.4	-23%	2013
	Under 25s from a minority ethnic group	602	13%	-26%	2011

	Secondary school attendance	N/A	91%	-0%	2013/14
	School leavers with a positive destination	129	84%	-6%	2013
	16 to 19 year olds not in employment, education or training	309	37%	+34%	2012
Health and Wellbeing	Pre-school children with likely development difficulties	N/A	8%	+10%	2012 - 2014
	Referrals to Children and Adolescent Mental Health Services	104	4%	+15%	2015/16
	Male healthy life expectancy (years)	N/A	54.9	-2%	2011
	Female healthy life expectancy (years)	N/A	57.7	-1%	2011
	Under 25s whose day-to-day activities are limited by disability	367	8%	+29%	2011

The number of 0-24 year olds in Knightswood has decreased by 5% since 2011, with declining numbers across all four age groups. Healthy life expectancy for males and females is approximately 1 year lower than Glasgow as a whole.

Pupil attainment in Knightswood is lower than in Glasgow overall, while child poverty and P1 obesity levels are on a par with the Glasgow average. Fewer children than average live in proximity to green space and primary school age children are less likely to walk to school. Secondary school attendance and the proportion of children and young people from minority ethnic groups are lower than Glasgow overall while referrals to children and adolescent mental health services are slightly higher.

Notes

1. Data sources: Census 2011, GCPH, Glasgow City Council, HMRC - Child Poverty Unit, ISD Scotland, National Records of Scotland (NRS), Transport Scotland, Sustrans, Police Scotland, the Scottish Government and the Urban Big Data Centre, Glasgow University.
2. Indicators are aggregated using latest available datazone (2001 or 2011); neighbourhood boundaries based on 2001 datazones.
3. All count figures of less than 5 (denoted as '< 5') have been suppressed to avoid any potential identification.
4. Populations presented in the population trend chart, also used to calculate healthy life expectancy estimates, use NRS small area population estimates for the years 2011 - 2015.
5. 'Healthy life expectancy' is an estimate of the average number of years people are likely to spend in good health. It is shorter than 'life expectancy' because it excludes years likely to be spent in fair or poor health. It is calculated using population estimates, death registrations and self-assessed health from the 2011 Census.
6. Denotes children referred to the Scottish Children's Reporter Administration for an offence or non-offence related reason.
7. A notes and definitions document providing further information on the indicators presented in the profile can be found in the Profiles section of www.understandingglasgow.com/profiles.
