

Ruchazie and Garthamlock

Ruchazie and Garthamlock is a neighbourhood in the north east of Glasgow with a population of 8,011.

Neighbourhood comparisons with Glasgow

Women in Ruchazie and Garthamlock live, on average, nearly five years longer than men. Compared with the Glasgow average, this area has higher levels of income and employment deprivation. The number of adults with qualifications at Higher level and above is low at 23%, which is 42% lower than the Glasgow average.

Group	Indicator	Count	Rate	Difference from Glasgow	Difference from Glasgow (% , years)
Population	People aged 0 - 15	1,746	21.8%	+41.0%	41
	People aged 16 - 64	5,175	64.6%	-8.3%	-8
	People aged 65 - 74	608	7.6%	-6.7%	-7
	People aged 75 and over	482	6.0%	+1.5%	2
	People from minority ethnic backgrounds	1,019	12.7%	-34.1%	-34
Households	Lone-parent households	1,201	15.2%	+48.1%	48
	Householders living alone	1,312	16.6%	-23.1%	-23
	Single-pensioner households	404	11.3%	-4.7%	-5
	Owner-occupied households	1,594	44.8%	-4.2%	-4
	Socially-rented households	1,713	48.1%	+38.0%	38
	Overcrowded households	183	5.1%	+9.2%	9
Environment	People who travel to work by walking, bike, public transport	720	20.7%	-21.9%	-22
	Households with one or more cars	2,073	58.2%	+4.5%	5
Socio-economic	People with grade D or E social classification	2,295	28.6%	+30.7%	31
	People in employment	3,607	45.0%	-5.3%	-5
Education	Adults with qualifications at Higher level and above	1,871	23.3%	-41.6%	-42
Poverty	Income deprivation (SIMD)	2,235	27.1%	+38.7%	39
	Employment deprivation (SIMD)	987	18.7%	+38.0%	38
	Children living in poverty	483	27.7%	+3.6%	4
Health	People in "good" or "very good" health	5,782	72.1%	-5.1%	-5
	People limited "a lot" or "a little" by disability	2,385	29.7%	+14.2%	14
	Male life expectancy at birth		70.4	-2.9	-3
	Female life expectancy at birth		75.1	-3.0	-3

Note: Different indicators use different population bases to calculate rates, depending on the underlying data source. See definitions and data sources for more information.

Neighbourhood/Area trends

Life expectancy at birth

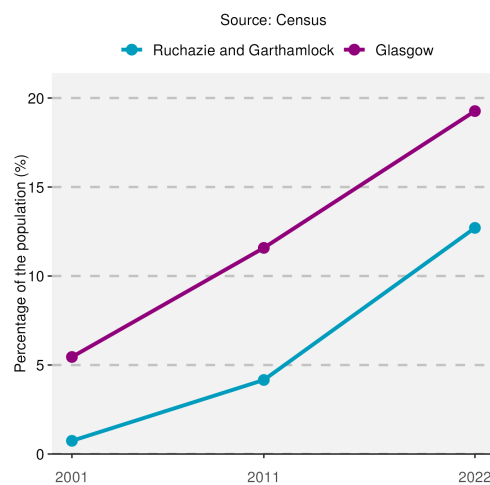

Life expectancy for females has risen in recent years in Ruchazie and Garthamlock but is below the Glasgow average. In the most recent period shown (2018-2022), life expectancy in this area is lower than the Scottish average.

Population by age group

Percentage of total population from a minority ethnic group

The overall population of Ruchazie and Garthamlock stayed roughly the same between 2001 and 2022. Throughout all age groups there were fluctuations which balanced this out overall. The percentage of the total neighbourhood population from a minority ethnic background increased from 0.7% in 2001 to 12.7% in 2022 but remained below the Glasgow average.

Notes

1. Data sources: Scottish Index of Multiple Deprivation (SIMD) 2020, Census 2022, 2011, and 2001, National Records of Scotland (NRS).
2. Populations presented in the population trend chart and used to calculate life expectancy estimates are taken from NRS small area population estimates and are based on: the 2001 and 2011 Census for years 2001-2010; and the 2011 and 2022 Census for years 2011-2022.
3. This publication has used small area population estimate data published by the NRS on 21 November 2021. The NRS update their small area population estimates and previous estimates on an annual basis therefore this data is only representative of the data published upon this date. For further information see: <https://www.nrscotland.gov.uk/publications/small-area-population-estimates-mid-2022/>
4. The Income deprivation and Employment deprivation indicators are derived from SIMD 2020, more information on this deprivation index can be found at: <https://www.gov.scot/collections/scottish-index-of-multiple-deprivation-2020/>.
5. Life expectancies are calculated based on population estimates and death registrations. 95% confidence intervals have been added on the graphs to the neighbourhood data to give an indication of their accuracy. The 95% confidence interval for the Glasgow and/or Scotland comparison line has been removed due to the size of the population. This resulted in the confidence interval sitting on the data line making it unreadable. The x-axes of the life expectancy graphs give the mid-year for each life expectancy estimate e.g. 2020 represents the life expectancy estimate for the period 2018-2022.
6. A notes and definitions document providing further information on the variables presented in the profile can be found in the Profiles section of the Understanding Glasgow website: <https://www.understandingglasgow.com/profiles/neighbourhood-profiles>.
