

Shawlands and Strathbungo

Shawlands and Strathbungo is a neighbourhood in the south of Glasgow with a population of 9,061.

Neighbourhood comparisons with Glasgow

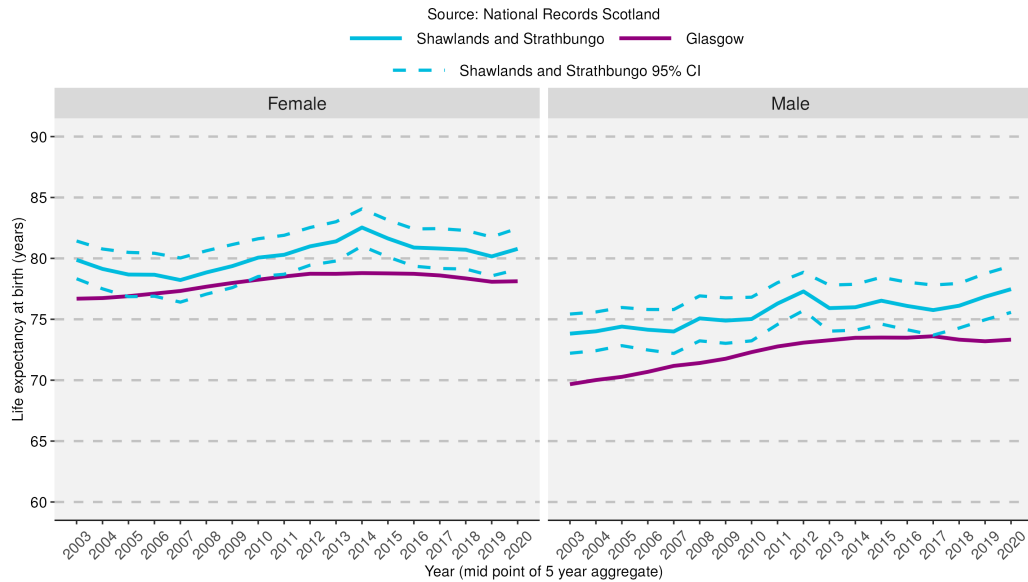

Women in Shawlands and Strathbungo live, on average, nearly three and a half years longer than men. There are low levels of lone-parent and socially-rented households in this area as well as income and employment deprivation.

Group	Indicator	Count	Rate	Difference from Glasgow	Difference from Glasgow (% , years)
Population	People aged 0 - 15	1,035	11.4%	-26.1%	
	People aged 16 - 64	6,885	76.0%	+7.8%	
	People aged 65 - 74	725	8.0%	-1.7%	
	People aged 75 and over	416	4.6%	-22.5%	
	People from minority ethnic backgrounds	1,543	17.1%	-11.4%	
Households	Lone-parent households	336	3.7%	-63.5%	
	Householders living alone	2,256	25.1%	+16.5%	
	Single-pensioner households	443	9.1%	-23.2%	
	Owner-occupied households	2,994	61.8%	+32.2%	
	Socially-rented households	415	8.6%	-75.4%	
	Overcrowded households	147	3.0%	-35.6%	
Environment	People who travel to work by walking, bike, public transport	1,673	30.5%	+15.1%	
	Households with one or more cars	2,998	61.9%	+11.0%	
Socio-economic	People with grade D or E social classification	965	10.7%	-51.3%	
	People in employment	5,689	62.9%	+32.5%	
Education	Adults with qualifications at Higher level and above	5,838	64.6%	+61.6%	
Poverty	Income deprivation (SIMD)	789	8.7%	-55.7%	
	Employment deprivation (SIMD)	468	6.8%	-49.8%	
	Children living in poverty	199	19.2%	-28.0%	
Health	People in "good" or "very good" health	7,554	83.5%	+10.0%	
	People limited "a lot" or "a little" by disability	1,640	18.1%	-30.3%	
	Male life expectancy at birth		77.5	+4.2	
	Female life expectancy at birth		80.8	+2.7	

Note: Different indicators use different population bases to calculate rates, depending on the underlying data source. See definitions and data sources for more information.

Neighbourhood/Area trends

Life expectancy at birth

Life expectancy for both males and females has risen in recent years in this area and is above the Glasgow average. In the most recent period shown (2018-2022), life expectancy in this area is higher for males than the Scottish average.

Population by age group

Percentage of total population from a minority ethnic group

The overall population of Shawlands and Strathbungo stayed roughly the same between 2001 and 2022. The overall population stayed roughly the same between 2001 and 2022, with fluctuations across age groups largely balancing out. The percentage of the total neighbourhood population from a minority ethnic background increased from 11% in 2001 to 17.1% in 2022 but is below the Glasgow average.

Notes

1. Data sources: Scottish Index of Multiple Deprivation (SIMD) 2020, Census 2022, 2011, and 2001, National Records of Scotland (NRS).
2. Populations presented in the population trend chart and used to calculate life expectancy estimates are taken from NRS small area population estimates and are based on: the 2001 and 2011 Census for years 2001-2010; and the 2011 and 2022 Census for years 2011-2022.
3. This publication has used small area population estimate data published by the NRS on 21 November 2021. The NRS update their small area population estimates and previous estimates on an annual basis therefore this data is only representative of the data published upon this date. For further information see: <https://www.nrscotland.gov.uk/publications/small-area-population-estimates-mid-2022/>
4. The Income deprivation and Employment deprivation indicators are derived from SIMD 2020, more information on this deprivation index can be found at: <https://www.gov.scot/collections/scottish-index-of-multiple-deprivation-2020/>.
5. Life expectancies are calculated based on population estimates and death registrations. 95% confidence intervals have been added on the graphs to the neighbourhood data to give an indication of their accuracy. The 95% confidence interval for the Glasgow and/or Scotland comparison line has been removed due to the size of the population. This resulted in the confidence interval sitting on the data line making it unreadable. The x-axes of the life expectancy graphs give the mid-year for each life expectancy estimate e.g. 2020 represents the life expectancy estimate for the period 2018-2022.
6. A notes and definitions document providing further information on the variables presented in the profile can be found in the Profiles section of the Understanding Glasgow website: <https://www.understandingglasgow.com/profiles/neighbourhood-profiles>.
