

Maryhill Road Corridor

Maryhill Road Corridor is a neighbourhood in the north west of Glasgow with a population of 16,262.

Neighbourhood comparisons with Glasgow

Women in Maryhill Road Corridor live, on average, four and a half years longer than men. This neighbourhood has one of the highest rates of householders living alone of all the neighbourhoods in Glasgow. The area has a very high rate of working-aged people (77%). The percentage of people living in income and employment deprivation is very similar to the Glasgow average.

Group	Indicator	Count	Rate	Difference from Glasgow	Difference from Glasgow (% , years)
Population	People aged 0 - 15	1,880	11.6%	-23.9%	
	People aged 16 - 64	12,461	76.6%	+8.2%	
	People aged 65 - 74	1,157	7.1%	-13.5%	
	People aged 75 and over	764	4.7%	-18.6%	
	People from minority ethnic backgrounds	3,088	18.7%	-2.9%	
Households	Lone-parent households	468	5.6%	-17.3%	
	Householders living alone	4,331	51.6%	+18.1%	
	Single-pensioner households	925	11.0%	-7.4%	
	Owner-occupied households	3,046	36.3%	-22.3%	
	Socially-rented households	3,329	39.7%	+13.8%	
	Overcrowded households	326	3.9%	-17.5%	
Environment	People who travel to work by walking, bike, public transport	2,399	33.9%	+27.6%	
	Households with one or more cars	4,035	48.1%	-13.7%	
Socio-economic	People with grade D or E social classification	1,865	26.8%	-7.1%	
	People in employment	7,940	54.3%	-3.2%	
Education	Adults with qualifications at Higher level and above	10,301	70.5%	+21.3%	
Poverty	Income deprivation (SIMD)	3,246	20.1%	+2.8%	
	Employment deprivation (SIMD)	1,782	14.4%	+6.1%	
	Children living in poverty	375	19.6%	-26.7%	
Health	People in "good" or "very good" health	12,995	78.7%	+3.6%	
	People limited "a lot" or "a little" by disability	3,920	23.7%	-8.8%	
	Male life expectancy at birth		72.4	-1.2	
	Female life expectancy at birth		77.0	-1.2	

Note: Different indicators use different population bases to calculate rates, depending on the underlying data source. See definitions and data sources for more information.

Neighbourhood/Area trends

Life expectancy at birth

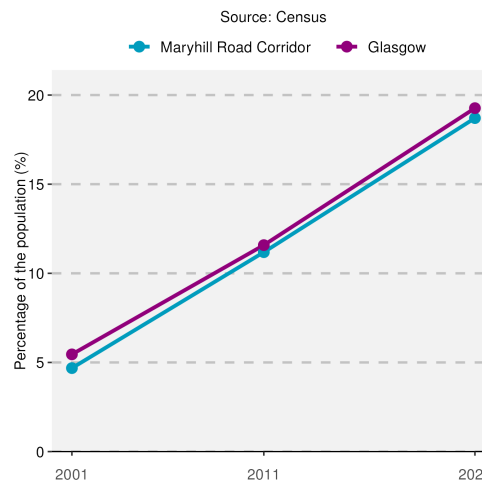

Life expectancy for both males and females has been stable in recent years in Maryhill Road Corridor and is below the Glasgow average. In the most recent period shown (2020-2024), life expectancy in this area is lower than the Scottish average.

Population by age group

Percentage of total population from minority ethnic backgrounds

The overall population of Maryhill Road Corridor increased between 2001 and 2024. This can be attributed to an increase in the population aged under 65. The percentage of the total neighbourhood population from a minority ethnic background increased from 4.7% in 2001 to 18.7% in 2022 but remained below the Glasgow average.

Notes

1. Data sources: Scottish Index of Multiple Deprivation (SIMD) 2020, Census 2022, 2011, and 2001, National Records of Scotland (NRS).
2. Populations presented in the population trend chart and used to calculate life expectancy estimates are taken from NRS small area population estimates and are based on: the 2001 and 2011 Census for years 2001-2010; and the 2011 and 2022 Census for years 2011-2024.
3. This publication has used small area population estimate data published by the NRS on 24 February 2026. The NRS update their small area population estimates and previous estimates on an annual basis therefore this data is only representative of the data published upon this date. For further information see: <https://www.nrscotland.gov.uk/publications/small-area-population-estimates-mid-2023-and-mid-2024-2011-data-zones/>
4. The Income deprivation and Employment deprivation indicators are derived from SIMD 2020, more information on this deprivation index can be found at: <https://www.gov.scot/collections/scottish-index-of-multiple-deprivation-2020/>.
5. Life expectancies are calculated based on population estimates and death registrations. 95% confidence intervals have been added on the graphs to the neighbourhood data to give an indication of their accuracy. The 95% confidence interval for the Glasgow and/or Scotland comparison line has been removed due to the size of the population. This resulted in the confidence interval sitting on the data line making it unreadable. The x-axes of the life expectancy graphs give the mid-year for each life expectancy estimate e.g. 2020 represents the life expectancy estimate for the period 2018-2022.
6. A notes and definitions document providing further information on the variables presented in the profile can be found in the Profiles section of the Understanding Glasgow website: <https://www.understandingglasgow.com/profiles/neighbourhood-profiles>.
