	Householders living alone	1,904	41.5%	-5.0%	-5.0%
	Single-pensioner households	838	18.3%	+53.5%	+53.5%
	Owner-occupied households	3,145	68.6%	+46.7%	+46.7%
	Socially-rented households	1,034	22.5%	-35.3%	-35.3%
	Overcrowded households	160	3.5%	-25.9%	-25.9%
<b>Environment</b>	People who travel to work by walking, bike, public transport	592	14.4%	-45.8%	-45.8%
	Households with one or more cars	3,075	67.1%	+20.3%	+20.3%
<b>Socio-economic</b>	People with grade D or E social classification	845	28.9%	+0.2%	+0.2%
	People in employment	4,253	52.3%	-6.8%	-6.8%
<b>Education</b>	Adults with qualifications at Higher level and above	3,722	45.8%	-21.2%	-21.2%
<b>Poverty</b>	Income deprivation (SIMD)	1,589	16.8%	-14.1%	-14.1%
	Employment deprivation (SIMD)	814	13.8%	+2.0%	+2.0%
	Children living in poverty	233	19.8%	-26.0%	-26.0%
<b>Health</b>	People in "good" or "very good" health	6,553	70.4%	-7.3%	-7.3%
	People limited "a lot" or "a little" by disability	2,978	32.0%	+22.9%	+22.9%
	Male life expectancy at birth		73.4	-0.2	-0.2
	Female life expectancy at birth		79.3	+1.1	+1.1

Note: Different indicators use different population bases to calculate rates, depending on the underlying data source. See definitions and data sources for more information.

# Neighbourhood/Area trends

## Life expectancy at birth

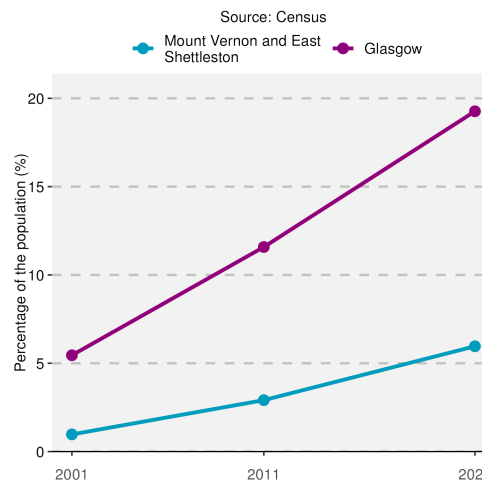

Life expectancy for both males and females has been stable in recent years in Mount Vernon and East Shettleston and is above the Glasgow average for females. In the most recent period shown (2020-2024), life expectancy in this area is lower than the Scottish average.

## Population by age group

## Percentage of total population from minority ethnic backgrounds

The overall population of Mount Vernon and East Shettleston decreased between 2001 and 2024. This is largely due to a decrease in people aged under 65. The percentage of the total neighbourhood population from a minority ethnic background increased from 1% in 2001 to 6% in 2022 but remained below the Glasgow average.

### Notes

1. Data sources: Scottish Index of Multiple Deprivation (SIMD) 2020, Census 2022, 2011, and 2001, National Records of Scotland (NRS).
2. Populations presented in the population trend chart and used to calculate life expectancy estimates are taken from NRS small area population estimates and are based on: the 2001 and 2011 Census for years 2001-2010; and the 2011 and 2022 Census for years 2011-2024.
3. This publication has used small area population estimate data published by the NRS on 24 February 2026. The NRS update their small area population estimates and previous estimates on an annual basis therefore this data is only representative of the data published upon this date. For further information see: <https://www.nrscotland.gov.uk/publications/small-area-population-estimates-mid-2023-and-mid-2024-2011-data-zones/>
4. The Income deprivation and Employment deprivation indicators are derived from SIMD 2020, more information on this deprivation index can be found at: <https://www.gov.scot/collections/scottish-index-of-multiple-deprivation-2020/>.
5. Life expectancies are calculated based on population estimates and death registrations. 95% confidence intervals have been added on the graphs to the neighbourhood data to give an indication of their accuracy. The 95% confidence interval for the Glasgow and/or Scotland comparison line has been removed due to the size of the population. This resulted in the confidence interval sitting on the data line making it unreadable. The x-axes of the life expectancy graphs give the mid-year for each life expectancy estimate e.g. 2020 represents the life expectancy estimate for the period 2018-2022.
6. A notes and definitions document providing further information on the variables presented in the profile can be found in the Profiles section of the Understanding Glasgow website: <https://www.understandingglasgow.com/profiles/neighbourhood-profiles>.
