

Children and young people's profile - Temple and Anniesland

Temple and Anniesland has a population of 3,043 children and young people (aged 0–24 years).

Neighbourhood comparisons with Glasgow

The population for all age groups is generally below the Glasgow average in Temple and Anniesland. The percentage of babies born before 37 weeks is lower than the Glasgow average by 29%. The number of children living in relative poverty in this area is 29% lower than the Glasgow average. The percentage of under-25s whose day-to-day activities are limited by disability is 14%, which is 20% above the Glasgow average. Life expectancy is higher in 2022 for both sexes than the Glasgow average but is lower than the Scottish average.

Group	Indicator	Time period	Count	Rate	Difference from Glasgow	Difference from Glasgow (% , years)
Demography	Population aged 0–4	2024	468	3.6%	-22.7%	
	Population aged 5–11	2024	762	5.8%	-13.1%	
	Population aged 12–17	2024	726	5.5%	-4.1%	
	Population aged 18–24	2024	1,087	8.3%	-31.6%	
	Live births**	2024	103	7.9	-16.4%	
	Under-25s from minority ethnic backgrounds	2022	829	25.8%	-10.8%	
Infant health	Infants who sleep in the supine position	2022–24	289	97.6%	-0.6%	
	Babies exposed to second-hand smoke	2022–24	19	6.4%	+7.5%	
	Babies born small for gestational age	2022–24	21	6.8%	+10.0%	
	Babies exclusively breast-fed at 6–8 weeks	2024	45	44.6%	+37.5%	
	Babies born before 37 weeks	2022–24	19	6.1%	-29.3%	
	Primary carer smoking at health visitor's first visit	2022–24	29	9.7%	-16.0%	
Crime & safety	Emergency hospital admissions due to assault**	2020–24	7	0.4	+1.2%	
	Emergency hospital admissions due to unintentional injuries**	2020–24	64	4.1	-0.4%	
Learning	Children with communication delay at 27–30 months	2022–24	36	15.4%	-12.3%	
	16–19-year-olds not in employment, education or training	2020	19	3.8%	-17.8%	
Socio-economic	Children living in relative poverty	2023	344	19.2%	-28.5%	
	Lone-parent households	2022	1,026	23.5%	-3.2%	
	Under-25s living in privately-rented or rent-free households	2022	751	23.4%	+1.0%	
Health	Under-25s whose day-to-day activities are limited by disability	2022	446	13.9%	+19.8%	
	Hospital admissions for dental treatment**	2020–24	57	6.0	-0.0%	
	Hospitalisations under an alcohol-related diagnosis**	2020–24	17	1.1	-0.8%	
	Hospital admissions under a mental health diagnosis**	2020–24	40	3.8	-13.1%	
	Primary 1 children living with obesity or severe obesity	2022–24	23	9.1%	+3.5%	
	Male life expectancy at birth	2022		74.9	+1.3	
	Female life expectancy at birth	2022		79.9	+1.6	

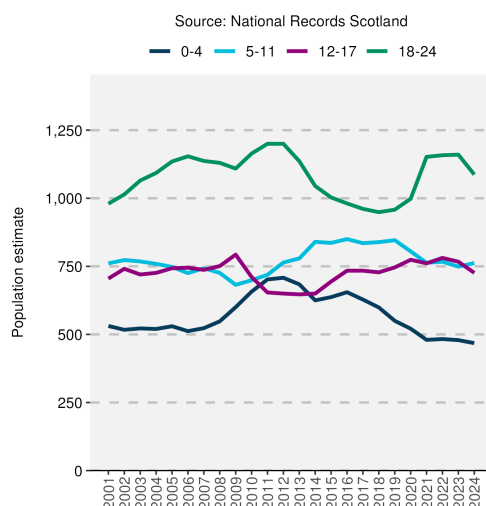

Note: Different indicators use different population bases to calculate rates, depending on the underlying data source. See definitions and data sources for more information.

All count figures of equal to or less than 5 (denoted as *) have been suppressed to avoid any potential identification.

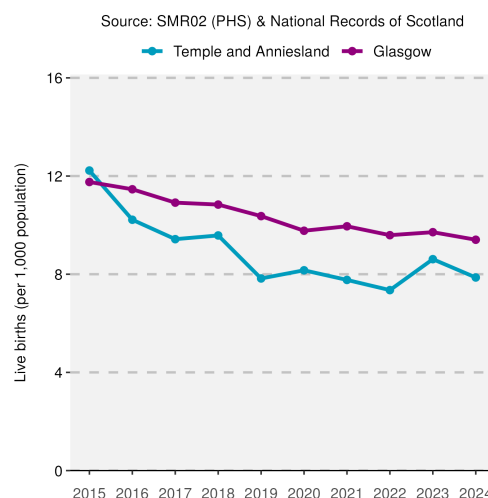

All indicators (denoted as **) are measured as the rate per 1,000 of the whole population or of a particular age group rather than as a percentage of the population. See definitions for more information.

Neighbourhood/Area trends

Population by age group

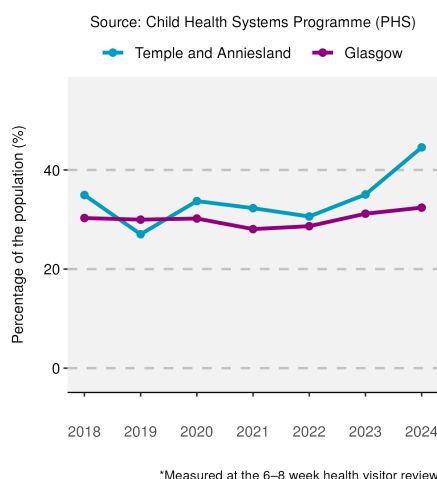

Live births (per 1,000 population)

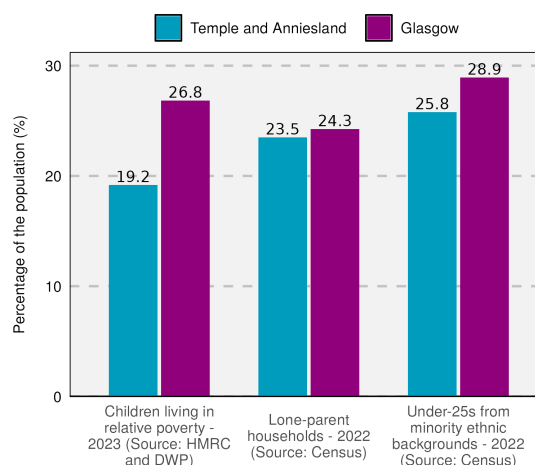

Populations across all age groups have fluctuated but overall there has been an increase over the time period, with the exception of 0–4-year-olds which has reduced by 12%. The number of live births also fluctuated over the time period, showing an overall decrease but consistently remain below the Glasgow average.

Percentage of babies exclusively breast-fed*

Selected indicators compared to Glasgow

Babies exclusively breast-fed at 6-8 weeks generally continue to fluctuate above the Glasgow average, with the largest increase seen in 2024. The percentage of children living in relative poverty, lone-parent households, and under-25s from minority ethnic backgrounds are all below the Glasgow average.

Notes

1. Data sources: Scottish Index of Multiple Deprivation (SIMD) 2020; Census (2001, 2011 and 2022); National Records of Scotland (NRS); Scottish Morbidity Records (SMR01 and SMR02); Child Health Systems Programme (CHSP) and CHSP Schools; Department for Work and Pensions (DWP); HM Revenue and Customs (HMRC).
2. All count figures of less than 5 (denoted as *) have been suppressed to avoid any potential identification.
3. This publication has used small area population estimate data published by the NRS on 24 February 2026. This is presented in the population trend chart and used to calculate life expectancy estimates. The NRS update their small area population estimates and previous estimates on an annual basis therefore this data is only representative of the data published upon this date. For further information see: <https://www.nrscotland.gov.uk/publications/small-area-population-estimates-mid-2023-and-mid-2024-2011-data-zones/>
4. Life expectancies are calculated based on population estimates and death registrations. 95% confidence intervals have been added on the graphs to the neighbourhood data to give an indication of their accuracy. The 95% confidence interval for the Glasgow and/or Scotland comparison line has been removed due to the size of the population. This resulted in the confidence interval sitting on the data line making it unreadable. The x-axes of the life expectancy graphs give the mid-year for each life expectancy estimate e.g. 2020 represents the life expectancy estimate for the period 2018-2022.
5. A notes and definitions document providing further information on the variables presented in the profile can be found in the Profiles section of the Understanding Glasgow website: <https://www.understandingglasgow.com/profiles/children-young-people-s-profiles>.
