

Children and young people’s profile - Bellahouston, Craighton and Mosspark

Bellahouston, Craighton and Mosspark has a population of 2,123 children and young people (aged 0–24 years).

Neighbourhood comparisons with Glasgow

The population aged 18–24 years is 39% lower than the Glasgow average. The number of babies born small for gestational age is 55% lower than the Glasgow average and 16-19-year-olds not in employment, education or training is 40% lower. Life expectancy in 2022 for males is higher than the Glasgow average, whereas females is lower.

Group	Indicator	Time period	Count	Rate	Difference from Glasgow	Difference from Glasgow (% , years)	
						Bar chart (left)	Bar chart (right)
Demography	Population aged 0-4	2024	405	4.6%	-0.2%		
	Population aged 5-11	2024	593	6.8%	+0.8%		
	Population aged 12-17	2024	479	5.5%	-5.6%		
	Population aged 18-24	2024	646	7.4%	-39.3%		
	Live births**	2024	103	11.7	+24.8%		
	Under-25s from minority ethnic backgrounds	2022	630	30.6%	+5.9%		
Infant health	Infants who sleep in the supine position	2022-24	250	98.4%	+0.2%		
	Babies exposed to second-hand smoke	2022-24	12	4.5%	-23.9%		
	Babies born small for gestational age	2022-24	8	2.8%	-54.6%		
	Babies exclusively breast-fed at 6-8 weeks	2024	30	33.7%	+4.0%		
	Babies born before 37 weeks	2022-24	22	7.7%	-11.3%		
	Primary carer smoking at health visitor’s first visit	2022-24	30	11.3%	-2.7%		
Crime & safety	Emergency hospital admissions due to assault**	2020-24	*				
	Emergency hospital admissions due to unintentional injuries**	2020-24	52	5.0	+20.7%		
Learning	Children with communication delay at 27-30 months	2022-24	27	11.7%	-33.4%		
	16-19-year-olds not in employment, education or training	2020	10	2.8%	-40.2%		
Socio-economic	Children living in relative poverty	2023	302	23.7%	-11.9%		
	Lone-parent households	2022	585	18.4%	-24.0%		
	Under-25s living in privately-rented or rent-free households	2022	346	16.8%	-27.3%		
Health	Under-25s whose day-to-day activities are limited by disability	2022	248	12.1%	+4.1%		
	Hospital admissions for dental treatment**	2020-24	34	5.0	-17.8%		
	Hospitalisations under an alcohol-related diagnosis**	2020-24	8	0.8	-30.3%		
	Hospital admissions under a mental health diagnosis**	2020-24	26	4.0	-7.8%		
	Primary 1 children living with obesity or severe obesity	2022-24	22	9.1%	+2.7%		
	Male life expectancy at birth	2022		73.9	+0.2		
	Female life expectancy at birth	2022		78.1	-0.1		

Note: Different indicators use different population bases to calculate rates, depending on the underlying data source. See definitions and data sources for more information.

All count figures of equal to or less than 5 (denoted as *) have been suppressed to avoid any potential identification.

All indicators (denoted as **) are measured as the rate per 1,000 of the whole population or of a particular age group rather than as a percentage of the population. See definitions for more information.

Neighbourhood/Area trends

Population by age group

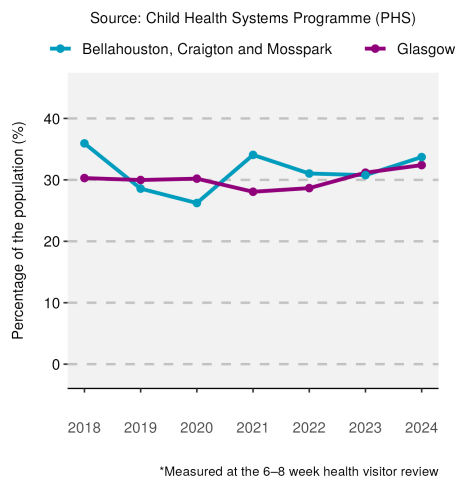

Live births (per 1,000 population)

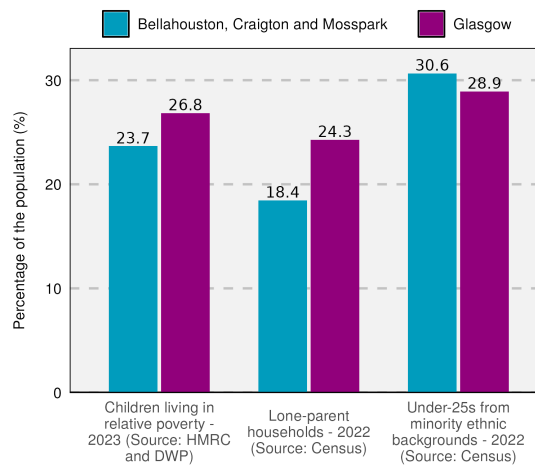

Populations across all age groups have increased since 2001, with an overall rise of 10%. This growth has been largely attributed to the 18–24 age group, which increased by 24% during this period. Since 2015, the number of live births has fluctuated above and below the Glasgow average. In 2024, the figure is now slightly above that of Glasgow.

Percentage of babies exclusively breast-fed*

Selected indicators compared to Glasgow

The proportion of babies exclusively breast-fed at 6-8 weeks varies over time but remains lower than the Glasgow average, at 34% in 2024. The percentage of children living in relative poverty and lone-parent households is below the Glasgow average, whereas under-25s from a minority ethnic background is above the Glasgow average.

Notes

1. Data sources: Scottish Index of Multiple Deprivation (SIMD) 2020; Census (2001, 2011 and 2022); National Records of Scotland (NRS); Scottish Morbidity Records (SMR01 and SMR02); Child Health Systems Programme (CHSP) and CHSP Schools; Department for Work and Pensions (DWP); HM Revenue and Customs (HMRC).
2. All count figures of less than 5 (denoted as *) have been suppressed to avoid any potential identification.
3. This publication has used small area population estimate data published by the NRS on 24 February 2026. This is presented in the population trend chart and used to calculate life expectancy estimates. The NRS update their small area population estimates and previous estimates on an annual basis therefore this data is only representative of the data published upon this date. For further information see: <https://www.nrscotland.gov.uk/publications/small-area-population-estimates-mid-2023-and-mid-2024-2011-data-zones/>
4. Life expectancies are calculated based on population estimates and death registrations. 95% confidence intervals have been added on the graphs to the neighbourhood data to give an indication of their accuracy. The 95% confidence interval for the Glasgow and/or Scotland comparison line has been removed due to the size of the population. This resulted in the confidence interval sitting on the data line making it unreadable. The x-axes of the life expectancy graphs give the mid-year for each life expectancy estimate e.g. 2020 represents the life expectancy estimate for the period 2018-2022.
5. A notes and definitions document providing further information on the variables presented in the profile can be found in the Profiles section of the Understanding Glasgow website: <https://www.understandingglasgow.com/profiles/children-young-people-s-profiles>.
