

Children and young people's profile - Calton and Bridgeton

Calton and Bridgeton has a population of 7,573 children and young people (aged 0–24 years).

Neighbourhood comparisons with Glasgow

There is a high proportion of 18–24-year-olds in Calton and Bridgeton, 68% higher than the Glasgow average. Under-25s from minority ethnic backgrounds account for 34% of the population, 17% higher than the Glasgow average. The percentage of 16-19-year-olds not in employment, education or training is 46% higher, hospital admissions for dental treatment is 23% higher, and lone-parent households is 27% higher when compared to the Glasgow average. There is a below-average percentage of hospitalisations under a mental health diagnosis, 30% lower than Glasgow. Life expectancy is lower in 2022 for both sexes than the Glasgow and Scottish averages.

Group	Indicator	Time period	Count	Rate	Difference from Glasgow	Difference from Glasgow (% , years)
Demography	Population aged 0–4	2024	899	4.1%	-10.7%	
	Population aged 5–11	2024	1,260	5.8%	-13.6%	
	Population aged 12–17	2024	968	4.4%	-23.1%	
	Population aged 18–24	2024	4,446	20.4%	+68.3%	
	Live births**	2024	194	8.9	-5.3%	
	Under-25s from minority ethnic backgrounds	2022	2,163	33.9%	+17.2%	
Infant health	Infants who sleep in the supine position	2022–24	464	97.7%	-0.5%	
	Babies exposed to second-hand smoke	2022–24	29	5.8%	-1.4%	
	Babies born small for gestational age	2022–24	40	7.6%	+24.1%	
	Babies exclusively breast-fed at 6–8 weeks	2024	44	26.2%	-19.2%	
	Babies born before 37 weeks	2022–24	46	8.8%	+1.3%	
	Primary carer smoking at health visitor's first visit	2022–24	68	13.7%	+18.3%	
Crime & safety	Emergency hospital admissions due to assault**	2020–24	16	0.5	+8.8%	
	Emergency hospital admissions due to unintentional injuries**	2020–24	99	3.0	-27.5%	
Learning	Children with communication delay at 27–30 months	2022–24	85	19.1%	+8.6%	
	16–19-year-olds not in employment, education or training	2020	74	6.7%	+46.4%	
Socio-economic	Children living in relative poverty	2023	865	36.5%	+35.8%	
	Lone-parent households	2022	1,608	30.8%	+26.8%	
	Under-25s living in privately-rented or rent-free households	2022	1,703	26.7%	+15.3%	
Health	Under-25s whose day-to-day activities are limited by disability	2022	699	11.0%	-5.5%	
	Hospital admissions for dental treatment**	2020–24	98	7.4	+23.2%	
	Hospitalisations under an alcohol-related diagnosis**	2020–24	34	1.0	-6.7%	
	Hospital admissions under a mental health diagnosis**	2020–24	77	3.1	-29.6%	
	Primary 1 children living with obesity or severe obesity	2022–24	37	8.4%	-5.0%	
	Male life expectancy at birth	2022		69.9	-3.7	
	Female life expectancy at birth	2022		75.7	-2.6	

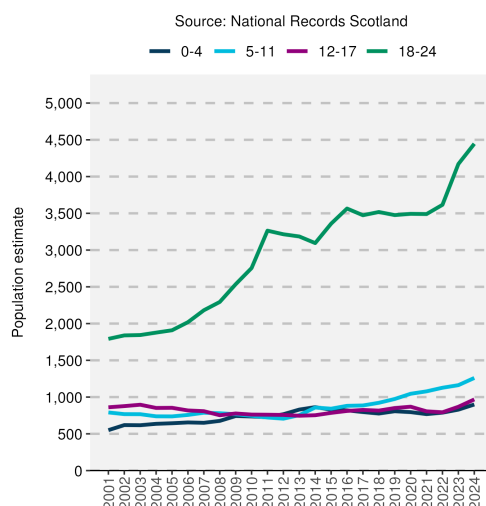

Note: Different indicators use different population bases to calculate rates, depending on the underlying data source. See definitions and data sources for more information.

All count figures of equal to or less than 5 (denoted as *) have been suppressed to avoid any potential identification.

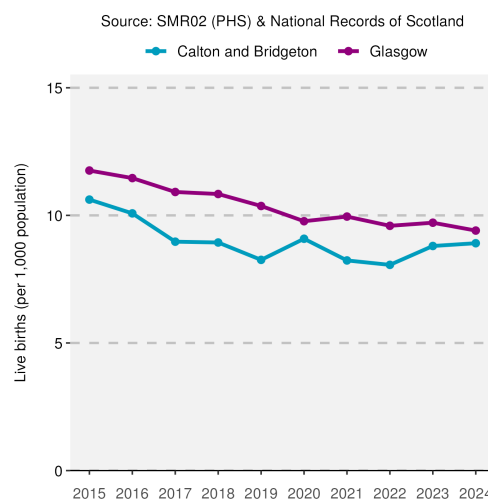

All indicators (denoted as **) are measured as the rate per 1,000 of the whole population or of a particular age group rather than as a percentage of the population. See definitions for more information.

Neighbourhood/Area trends

Population by age group

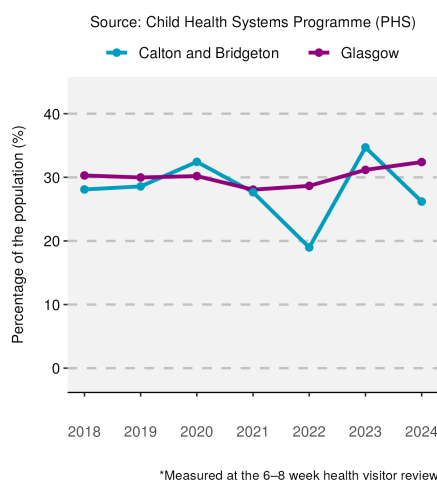

Live births (per 1,000 population)

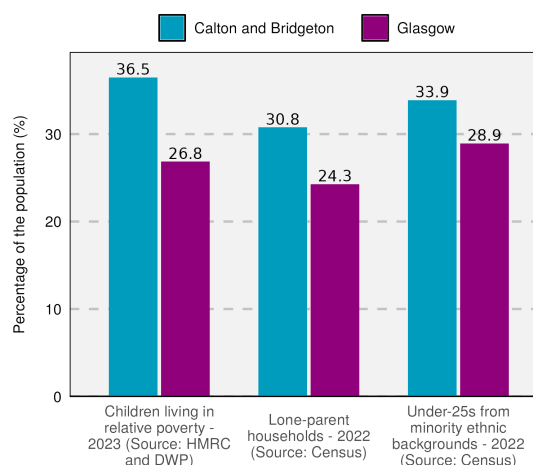

Populations across all age groups have increased since 2001, with an overall rise of 90%. Those aged 18–24 years showed the biggest increase of 148% during this period. Since 2015, live births in Calton and Bridgeton have fallen consistently just below the Glasgow average.

Percentage of babies exclusively breast-fed*

Selected indicators compared to Glasgow

The number of babies exclusively breast-fed at 6–8 weeks varies over time but remains lower than the Glasgow average, at 26% in 2024. The percentage of children living in relative poverty, lone-parent households and under-25s from a minority ethnic background are all above the average in Glasgow.

Notes

1. Data sources: Scottish Index of Multiple Deprivation (SIMD) 2020; Census (2001, 2011 and 2022); National Records of Scotland (NRS); Scottish Morbidity Records (SMR01 and SMR02); Child Health Systems Programme (CHSP) and CHSP Schools; Department for Work and Pensions (DWP); HM Revenue and Customs (HMRC).
2. All count figures of less than 5 (denoted as *) have been suppressed to avoid any potential identification.
3. This publication has used small area population estimate data published by the NRS on 24 February 2026. This is presented in the population trend chart and used to calculate life expectancy estimates. The NRS update their small area population estimates and previous estimates on an annual basis therefore this data is only representative of the data published upon this date. For further information see: <https://www.nrscotland.gov.uk/publications/small-area-population-estimates-mid-2023-and-mid-2024-2011-data-zones/>
4. Life expectancies are calculated based on population estimates and death registrations. 95% confidence intervals have been added on the graphs to the neighbourhood data to give an indication of their accuracy. The 95% confidence interval for the Glasgow and/or Scotland comparison line has been removed due to the size of the population. This resulted in the confidence interval sitting on the data line making it unreadable. The x-axes of the life expectancy graphs give the mid-year for each life expectancy estimate e.g. 2020 represents the life expectancy estimate for the period 2018–2022.
5. A notes and definitions document providing further information on the variables presented in the profile can be found in the Profiles section of the Understanding Glasgow website: <https://www.understandingglasgow.com/profiles/children-young-people-s-profiles>.
