

Children and young people's profile - Glasgow South

Glasgow South has a population of 62,618 children and young people (aged 0–24 years).

Comparisons with Scotland

There is a high proportion of 0–4-year-olds in Glasgow South, 16% higher than the Scottish average. Children and young people from minority ethnic backgrounds make up 34% of the population, 194% higher than the Scottish average. Babies born small for gestational age, children living in relative poverty, and lone-parent households are all higher than the Scottish average, 19%, 80% and 14% higher respectively. Life expectancy in 2022 for both sexes was higher than the Glasgow average but lower than the Scottish average.

Group	Indicator	Time period	Count	Rate	Difference from Scotland	Difference from Scotland (% , years)	
						Percentage	Years
Demography	Population aged 0–4	2024	12,142	5.2%	+16.0%	16.0%	0
	Population aged 5–11	2024	16,903	7.2%	-1.0%	-1.0%	0
	Population aged 12–17	2024	14,597	6.2%	-7.6%	-7.6%	0

	Live births**	2024	2,557	10.8	+39.4%	39.4%	0
	Under-25s from minority ethnic backgrounds	2022	21,021	34.0%	+193.6%	193.6%	0
Infant health	Infants who sleep in the supine position	2022-24	6,889	98.3%	+0.1%	0.1%	0
	Babies exposed to second-hand smoke	2022-24	318	4.5%	-24.2%	-24.2%	0
	Babies born small for gestational age	2022-24	451	6.0%	+19.1%	19.1%	0
	Babies exclusively breast-fed at 6–8 weeks	2024	840	34.0%	+5.1%	5.1%	0
	Babies born before 37 weeks	2022-24	693	9.2%	+7.8%	7.8%	0
	Primary carer smoking at health visitor's first visit	2022-24	735	10.4%	-10.4%	-10.4%	0
	Emergency hospital admissions due to assault**	2020-24	125	0.4	+44.7%	44.7%	0
Crime & safety	Emergency hospital admissions due to unintentional injuries**	2020-24	1,451	4.7	+16.0%	16.0%	0
	Children with communication delay at 27–30 months	2022-24	1,065	16.3%	-7.3%	-7.3%	0
Learning	16-19-year-olds not in employment, education or training	2020	410	4.1%	+5.2%	5.2%	0
	Children living in relative poverty	2023	11,194	29.4%	+80.1%	80.1%	0
Socio-economic	Lone-parent households	2022	19,671	21.2%	+14.2%	14.2%	0
	Under-25s living in privately-rented or rent-free households	2022	12,733	20.6%	+15.1%	15.1%	0
	Under-25s whose day-to-day activities are limited by disability	2022	7,144	11.5%	+10.3%	10.3%	0
Health	Hospital admissions for dental treatment**	2020-24	1,288	6.3	+6.1%	6.1%	0
	Hospitalisations under an alcohol-related diagnosis**	2020-24	303	1.0	+6.3%	6.3%	0
	Hospital admissions under a mental health diagnosis**	2020-24	931	4.9	-14.2%	-14.2%	0
	Primary 1 children living with obesity or severe obesity	2022-24	649	9.4%	+6.6%	6.6%	0
	Male life expectancy at birth	2022		74.7	-2.2	-2.2	0
	Female life expectancy at birth	2022		79.1	-1.8	-1.8	0

Note: Different indicators use different population bases to calculate rates, depending on the underlying data source. See definitions and data sources for more information.

All count figures of equal to or less than 5 (denoted as *) have been suppressed to avoid any potential identification.

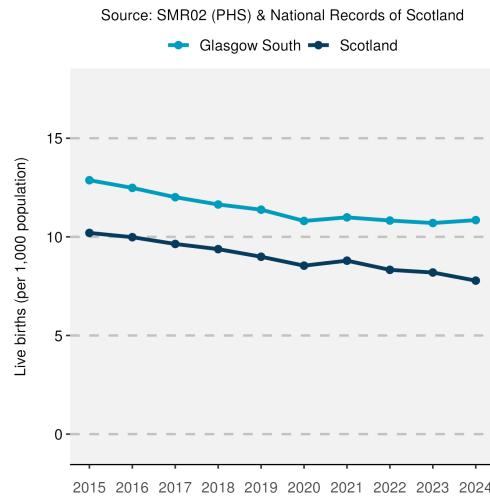

All indicators (denoted as **) are measured as the rate per 1,000 of the whole population or of a particular age group rather than as a percentage of the population. See definitions for more information.

Area trends

Population by age group

Live births (per 1,000 population)

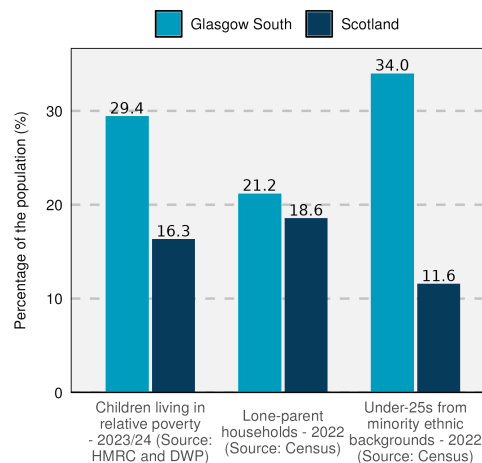

The overall population of Glasgow South has fallen by 7% since 2001. This decrease can be seen in all age groups, with the largest decrease seen in those aged 12–17 (13%). The number of live births in Glasgow South has decreased since 2015 but has consistently remained above the Scottish average.

Percentage of babies exclusively breast-fed*

*Measured at the 6–8 week health visitor review

Selected indicators compared to Scotland

In Glasgow South, 34% of babies reviewed in 2024 were exclusively breast-fed at 6–8 weeks. This has increased slightly since 2018 and is above the Scottish average. The percentage of children living in relative poverty, lone-parent households and under-25s from minority ethnic backgrounds in particular are all above the Scottish average.

Notes

1. Data sources: Scottish Index of Multiple Deprivation (SIMD) 2020; Census (2001, 2011 and 2022); National Records of Scotland (NRS); Scottish Morbidity Records (SMR01 and SMR02); Child Health Systems Programme (CHSP) and CHSP Schools; Department for Work and Pensions (DWP); HM Revenue and Customs (HMRC).
2. All count figures of less than 5 (denoted as “**”) have been suppressed to avoid any potential identification.
3. This publication has used small area population estimate data published by the NRS on 24 February 2026. This is presented in the population trend chart and used to calculate life expectancy estimates. The NRS update their small area population estimates and previous estimates on an annual basis therefore this data is only representative of the data published upon this date. For further information see: <https://www.nrscotland.gov.uk/publications/small-area-population-estimates-mid-2023-and-mid-2024-2011-data-zones/>
4. Life expectancies are calculated based on population estimates and death registrations. 95% confidence intervals have been added on the graphs to the neighbourhood data to give an indication of their accuracy. The 95% confidence interval for the Glasgow and/or Scotland comparison line has been removed due to the size of the population. This resulted in the confidence interval sitting on the data line making it unreadable. The x-axes of the life expectancy graphs give the mid-year for each life expectancy estimate e.g. 2020 represents the life expectancy estimate for the period 2018–2022.
5. A notes and definitions document providing further information on the variables presented in the profile can be found in the Profiles section of the Understanding Glasgow website: <https://www.understandingglasgow.com/profiles/children-young-people-s-profiles>.
