

Children and young people's profile - Toryglen

Toryglen has a population of 1,550 children and young people (aged 0–24 years).

Neighbourhood comparisons with Glasgow

In Toryglen the population of 0–17-year-olds is higher than the Glasgow average, while the 18–24 age group is 35% lower. Under-25s from a minority ethnic background is make up 35% (21% higher than the average). The percentage of babies born before 37 weeks is 57% higher, babies exposed to second-hand smoke is 28% higher, and primary carer smoking at health visitor's first visit is 26% higher than the Glasgow average. Hospital admissions under a mental health diagnosis are 24% lower and the number of children with communication delay at 27-30 months is 27% lower. Life expectancy is lower in 2022 for both sexes than the Glasgow and Scottish averages.

Group	Indicator	Time period	Count	Rate	Difference from Glasgow	Difference from Glasgow (% , years)
Demography	Population aged 0–4	2024	292	5.6%	+20.2%	20.2%
	Population aged 5–11	2024	460	8.8%	+30.7%	30.7%

	Male life expectancy at birth	2022		73.4	-0.3	-0.3
	Female life expectancy at birth	2022		77.4	-0.8	-0.8

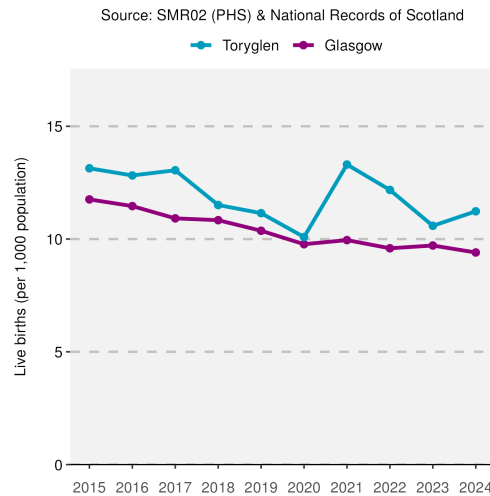

Note: Different indicators use different population bases to calculate rates, depending on the underlying data source. See definitions and data sources for more information.
 All count figures of equal to or less than 5 (denoted as *) have been suppressed to avoid any potential identification.
 All indicators (denoted as **) are measured as the rate per 1,000 of the whole population or of a particular age group rather than as a percentage of the population. See definitions for more information.

Neighbourhood/Area trends

Population by age group

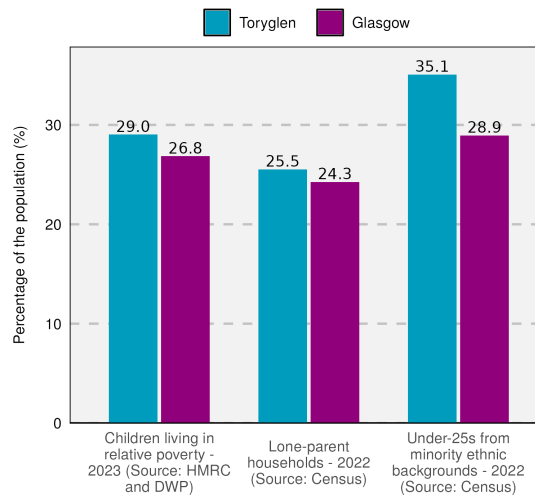

Live births (per 1,000 population)

The population of Toryglen has shown an overall decrease of 5% since 2001. Those aged 5–11 years show an overall decrease of 9%, with a steady decline year on year until 2012 evidently followed by a gradual rise to current levels. In Toryglen, live births have consistently remained above the Glasgow average. There has been an overall decrease since 2015, although there was a significant rise in 2021 before declining again.

Selected indicators compared to Glasgow

The chart for percentage of babies exclusively breast-fed has not been included for **Toryglen** due to counts of less than (or equal to) five which may pose a risk of disclosure.

The chart for the percentage of babies exclusively breast-fed at 6-8 weeks has not been included due to a risk of disclosure and risk the identification of individuals. The percentage of children living in relative poverty, lone-parent households and under-25s from a minority ethnic background are all above the Glasgow average.

Notes

1. Data sources: Scottish Index of Multiple Deprivation (SIMD) 2020; Census (2001, 2011 and 2022); National Records of Scotland (NRS); Scottish Morbidity Records (SMR01 and SMR02); Child Health Systems Programme (CHSP) and CHSP Schools; Department for Work and Pensions (DWP); HM Revenue and Customs (HMRC).
2. All count figures of less than 5 (denoted as *) have been suppressed to avoid any potential identification.
3. This publication has used small area population estimate data published by the NRS on 24 February 2026. This is presented in the population trend chart and used to calculate life expectancy estimates. The NRS update their small area population estimates and previous estimates on an annual basis therefore this data is only representative of the data published upon this date. For further information see: <https://www.nrscotland.gov.uk/publications/small-area-population-estimates-mid-2023-and-mid-2024-2011-data-zones/>
4. Life expectancies are calculated based on population estimates and death registrations. 95% confidence intervals have been added on the graphs to the neighbourhood data to give an indication of their accuracy. The 95% confidence interval for the Glasgow and/or Scotland comparison line has been removed due to the size of the population. This resulted in the confidence interval sitting on the data line making it unreadable. The x-axes of the life expectancy graphs give the mid-year for each life expectancy estimate e.g. 2020 represents the life expectancy estimate for the period 2018-2022.
5. A notes and definitions document providing further information on the variables presented in the profile can be found in the Profiles section of the Understanding Glasgow website: <https://www.understandingglasgow.com/profiles/children-young-people-s-profiles>.
