

Child HEALTH

Immunisations

In 2024, Scotland had achieved a **95%** coverage of the 6-in-1 vaccine among children at age 12 months.

90% of children in Glasgow City Region aged 24 months had received the first MMR dose.

There are inequalities in the uptake of the HPV vaccine. In 2023/24:

- uptake was **higher among girls** compared to boys
- uptake was **higher in SIMD5** compared to SIMD1

mental health

In 2021 in Glasgow City Region, pupils across P5-S6 reported:

- **26%** excellent mental health
- **48%** good mental health
- **19%** fair mental health
- **3%** poor mental health

Physical activity

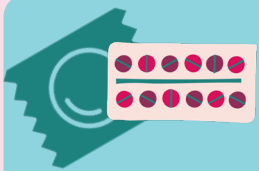

In 2023 in Glasgow:

49% pupils go to school using active travel, such as walking, cycling or using scooters.

3% of P5-S6 reported they **never did any physical activity**.

Sexual activity and pregnancy

In 2022, **14%** of S4-S6 pupils reported being sexually active.

58% had used contraception to prevent pregnancy the last time they had sex.

In Glasgow City region, there has been a **continuous downward trend** in the rate of pregnancies among young people since 2011-2013.

In Glasgow in 2022, teen pregnancies were more likely to result in terminations than in 2011.

dental hygiene

In 2022, **69%** of P1 pupils in Glasgow had no obvious decay experience.

There were however considerable differences depending on SIMDs:

- **89%** of P1s in SIMD5
- **57%** of P1s in SIMD1

breastfeeding

In 2023/24, **68%** of babies were breastfed at first visit.

This percentage more than halved at the 6-to-8 week review: **33%**, and again at the 13-15 months review: **16%**
